OSA - 0823-64

4 February 1964
FRC K-13-163

Amend. 2
74-CT-4004

Dear Hazel:

Subject: Engineering Change Proposal No. 1 - Revision 2a

Reference: 1) FRC K-13-126 ECP No. 1 Rev. 2
2) FRC K-13-100 ECP No. 1 Initial Estimate

Attached please find a description of the hardware and programming changes being incorporated in the GG8006A1 Navigational Panel. Also attached please find a layout drawing SK89134 which details the outline dimensions of the destination select panel and details the changes to the Destination/Fix Select Switch on the Nav Panel.

This revision includes the capability of automatic selection of destinations and includes a program to provide steering signals proportional to mach number. These changes resulted from additional requests from the ops personnel.

We are pleased to inform you that these added changes can be accomplished within the costs proposed in Reference Number 1.

Some slippage of schedule naturally occurred, but we are confident that we can deliver the first two Nav Panels, retrofitted, in May 1964, and will deliver one every two weeks provided the Field can spare the units for the retrofit.

STATINTL

If further information is needed, please feel free to call or myself.

Sincerely,

Gil
